WHAT IS FOREX BOT TRADING ?

Forex bot trading is the use of computer programs or algorithms to trade currencies in the foreign exchange market automatically, without manual human intervention.

These bots are designed to analyze the market, identify trading opportunities, and place buy or sell orders on behalf of the trader based on pre-set strategies.

 MONEY LINK PRO

HOW FOREX BOT TRADING WORKS:

PRE-PROGRAMMED STRATEGY – The bot follows specific rules like when to enter or exit a trade based on technical indicators, price movements, or patterns.

MARKET ANALYSIS – It continuously scans the forex market in real time, 24/7.

AUTOMATED EXECUTION – When the bot finds a suitable trade setup, it instantly places and manages trades.

RISK MANAGEMENT – It applies stop-loss, take-profit, and position sizing to control risk.

PROFIT TRACKING – All trading activity is recorded and monitored.

BENEFITS OF FOREX BOT TRADING:

- Trades faster and more accurately than humans.
- Operates 24/7, even when the trader is asleep.
- Removes emotions and stress from trading decisions.
- Allows backtesting to check how the strategy would have worked in the past.
- Can manage multiple currency pairs at the same time.
